Examiner:

Filed: January 8, 2001

Art Unit: 1645

For: METHODS AND COMPOSITIONS FOR REGULATING CELL CYCLE  
PROGRESSION

---

Commissioner for Patents  
Washington, D.C. 20231

**PRELIMINARY AMENDMENT**

Prior to examination of the above-identified application, the Examiner is respectfully requested to enter the following amendments.

**IN THE SEQUENCE LISTING**

Please replace pages 1-16 of the Sequence Listing filed previously with the substitute version submitted herewith. A marked up version showing the changes is attached hereto.

### REMARKS

The Notice of Missing Parts mailed April 4, 2001, identified an error in the CRF version of the previously filed Sequence Listing. The CRF version indicated that there were 46 sequences in the Sequence Listing when, in fact, there were 50 sequences listed. This error was also present in the paper copy of the Sequence Listing (on page 1, line 19, at identifier <160>). This error has now been corrected. The substitute paper copy of the Sequence Listing is attached hereto. A substitute CRF version is also submitted with the Response to Missing Parts, filed herewith.

The content of the copy in computer readable form is identical to the content of the paper copy of the "Sequence Listing". This submission includes no new matter.

If in the opinion of the Examiner, a telephone conference would expedite the prosecution of the subject application, the Examiner is invited to call the undersigned at (650) 843-5000.
